

Pilot by Knoll® Low Back

Designed by [Edward Barber and Jay Osgerby](#) 2016

Pilot is an innovative swivel lounge chair that marries visual and material lightness with exceptional comfort. The cantilevered seat, which features a unique upholstery substructure for greater flexibility, appears to float in the air, giving the chair a refined silhouette and an essential, timeless appeal.

Finishes

Two or three split upholstery available. Seat, back and upholstered arms can be specified in different fabrics or leathers. Fabric and leather cannot be mixed.

Dividends Horizon®

Designed by [Bernett and Dodziuk](#)

Dividends Horizon has the versatility to provide thoughtful primary workspaces for focus work and concentration, inspiring Activity Spaces to encourage teamwork and collaboration, and distinctive private office and conference spaces to support organizational structure and large teams. A consistent aesthetic and a robust set of common components and finish options support the wide range of demands of a dynamic and evolving office design.

Rapidly changing technology, the competitive economy and a diverse workforce are driving organizations to reimagine their workplace to compete for talent, increase speed to market and engage their people. Dividends Horizon helps organizations accomplish these goals, balancing concentration and collaboration; structure and innovation; cost containment and attract and retain.

[How To Purchase](#)

Key Benefits

A ROBUST AND VERSATILE SYSTEM SOLUTION. Dividends Horizon provides both strength and versatility in all workplace applications. Well-chosen horizons, diverse floor plans and the right combination of modular and freestanding furniture offer clients and designers the freedom to make the most of their workplace.

ARCHITECTURAL DELINEATION OF SPACE. Dividends Horizon delivers the right balance of concentration and collaboration. Panels provide a sense of privacy, refuge and organization in primary workspaces, while open weave screens and glass elements delineate space between primary and Activity Spaces without blocking light.

COST EFFICIENCY AND REDUCED COST OF OWNERSHIP. As organizations anticipate and address changes in the workplace, cost is a primary consideration. Dividends Horizon is an open plan system designed to evolve, delivering exceptional initial value and continued efficiency to minimize the total cost of ownership.

Tables & Storage

Reff Profiles tables and complementary storage offer the perfect addition to meeting spaces, private offices, and open plan workstations. Coordinated table edge profiles, hardware, finishes and sizes ensure seamless integration throughout the workplace.

Table Desks

Reff Profiles table desks deliver a light, adaptable solution for use in both individual and shared spaces. Reff Profiles table desks are at home in private offices and workstations and also respond to the need for collaborative spaces outside of the primary workstation. Reff Profiles table desks are available in a range of leg styles, including open frame legs, L-Legs, Reverse L-Legs, Soft Rectangular Legs, and Single Column to accommodate a range of customer preferences.

Sapper 50® Double Monitor Arm

Designed by Richard Sapper

The Sapper 50 monitor arm integrates the defining features of the collection, including interchangeability, adaptability and intuitive adjustment, and expands the capabilities of the collection to include support for two larger monitors and flat screen televisions of up to 30 pounds each.

Richard Sapper conceived the Sapper™ Monitor Arm Collection to set a new standard for intuitive functionality, ease of reconfiguration and unobtrusive visual elegance.

Solar™

Mesh Seat & Back Tilter, Asphalt Frame (8456)

Select Options:

Mesh Finish

 Storm, Mesh STM

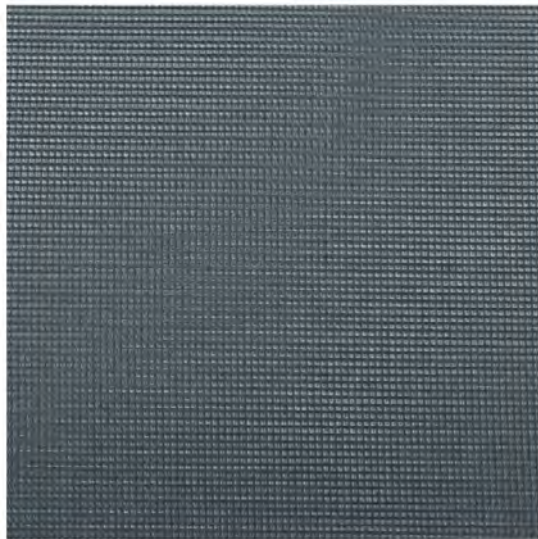

Base Finish

(STD) Asphalt Base APT

Caster Type or Glide Type

Please select **Casters for hard surfaces - LVT Flooring**

Storm (STM)

A beautifully fluid structure and integrated mesh surface come together in this new design from Paul Brooks.

- One-piece seat, back, fixed arm frame.
- Matching base is available in alabaster or asphalt plastic finishes. Optional aluminum base and sleek stationary glides are available.
- The mesh seat/back are offered in 3 colors - midnight, storm and dove.
- An integrated swivel tilt function is standard on Solar (with no control mechanism) along with seat height adjustment.
- Solar is perfect for training rooms, conference rooms and collaboration areas when desiring both a modern design and value.

Dimensions: W23.25 x D25 x H36 IN.

River™

Bring people together in a place where ideas, insight and inspiration can be shared. A modern design for today's collaborative, open plan, or any other commercial, education, government, healthcare or hospitality environment.

- Interlocking capabilities, quality construction and high traffic design deliver an endless array of curvilinear and rectilinear configurations.
- Three back heights available – Standard, High back and Extended back.
- Many seating units, benches (except round) and tables can be specified with power and USB outlets for mobile devices. Power/USB modules are available in either: White face plates and power/USB receptacles or Jet Black face plate and power/USB receptacles.
- Optional high traffic (HT) versions created for high use areas (schools, airport lounges) or multiple shift environments where the furniture must perform at all times.
- High traffic versions are rated for 350 lb. and is backed by Global's Heavy Duty Warranty.
- Unique 6.5" high tapered legs allow for ease of cleaning. Each leg is equipped with a non-marking nylon foot suitable for all types of flooring.
- Leg finishes are standard in Tungsten (TTU) and Black (TBL).
- Tables are made with high pressure laminate and coordinates with all the Global laminate finishes for casegoods and seating.
- Left or right arm location is always determined from a seated position.

Saarinen Coffee Tables

Designed by Eero Saarinen 1957

Eero Saarinen vowed to address the "ugly, confusing, unrestful world" he observed underneath chairs and tables - the so-called "slum of legs." A five-year design investigation led him to the revolutionary Pedestal Collection, including what is perhaps the most recognized table of the modern era.
